

Openbravo Professional Edition

Business Agility For Mid-Size Companies

In today's competitive economy, mid-sized organizations thrive when they can rapidly respond to changing market conditions.

Agile ERP from Openbravo empowers forward-thinking companies to achieve strategic advantage with the proven power of our industry-leading open source ERP. Over 6,000 companies worldwide rely on Openbravo's full-featured, affordable ERP because it delivers unmatched value throughout an organization.

Whether you're looking for your first business application suite, to replace an existing proprietary product with an open source solution achieve lower TCO, or to augment a current ERP with additional functionality as part of a two-tier ERP solution – Agile ERP from Openbravo can help you reach your goals.

Openbravo's open source innovation delivers a broad functional footprint and fully integrated set of tested extension modules. This allows Openbravo to be adapted to support your business, and spares you the challenges of changing your business to meet the limitations inherent in most legacy systems.

By enabling business agility, Openbravo customers streamline operations while gaining the ability to pursue new opportunities, or quickly & cost-efficiently respond to change in your industry or region. Openbravo is a 100% web based business management platform that is:

- Flexible and easy to adapt
- Web-based and cloud ready
- Productivity empowering user interface
- Affordable
