**Streamlining Management at Schools With**

**EduBold**

---

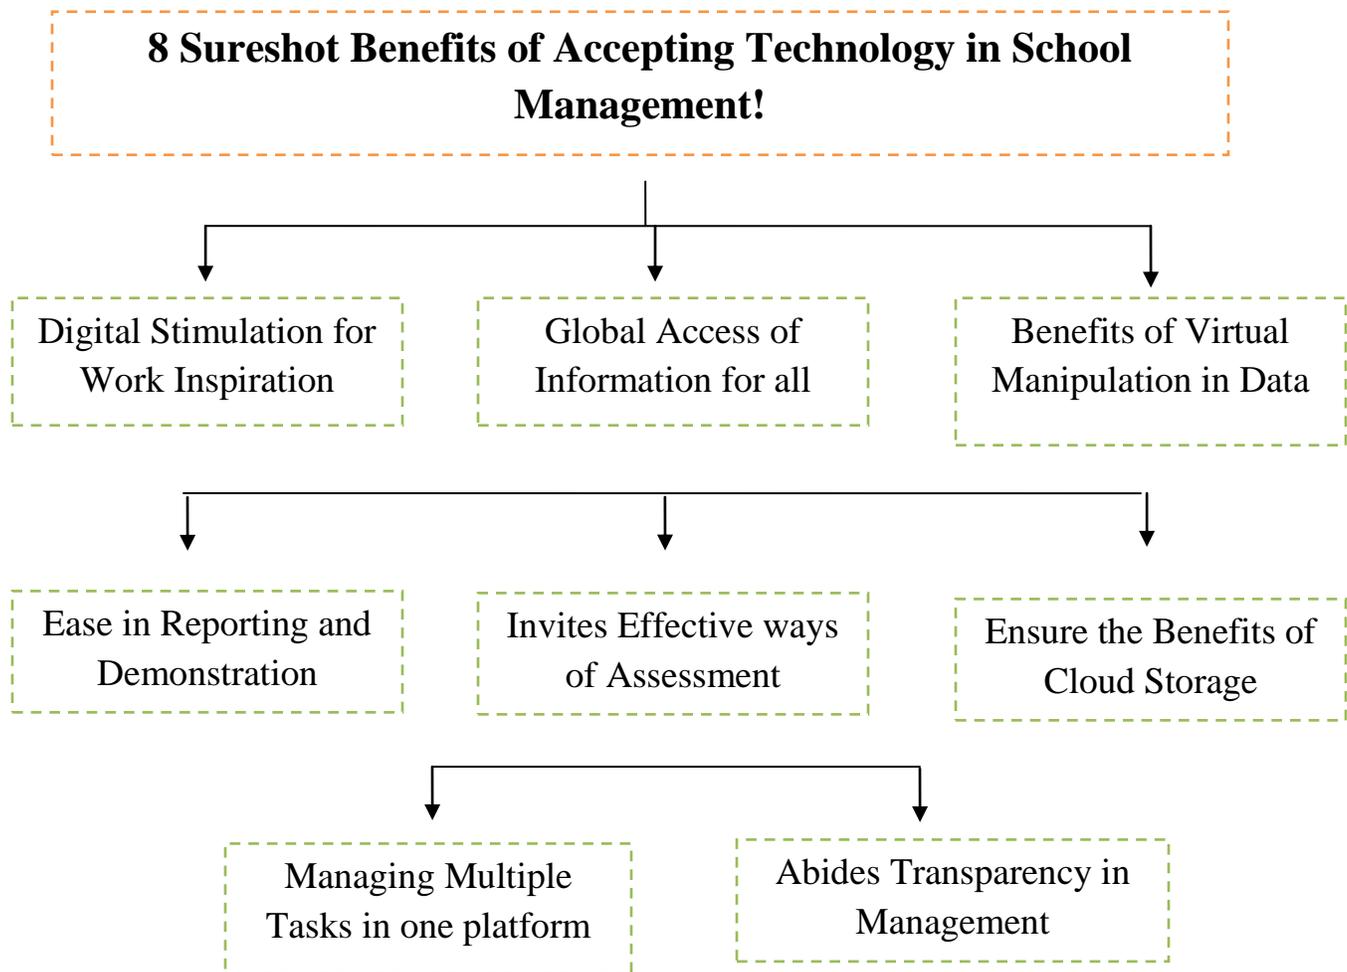

Why **Technology** should be the Integral part of  
Effective Management in School?

*With 'technology' and 'innovation' sharing the space at driving seat, the world is moving fast at a frenzy pace. Step ahead to accept the technology or sit back to abide failure- the two valid options that one has to forcefully acknowledge in the current scenario! While the education system has already accepted the concept of smart school, the need for innovative reforms in the management and administrative functionality is vital to address. The need for automated solutions in fees management, payroll governance, accounting supervision, record maintenance, etc. calls for an instant action!*

***Managing a school is not an easy cakewalk!*** The essential demand of reformation in administrative methodology and management functionality should be addressed for entertaining proper supervision in schools. It is notable that using the primitive methods of administration is not acceptable in the fast changing world. As technology leads our way, we need to show a constructive conscience of smart supervision coupled with effective eco-friendly ways of management. With **Edubold**, our sole motive is to provide 'technology-driven' solutions for all the school management related difficulties. Edubold works as a School ERP Management system that streamlines much of the crucial function of administration in a convenient way.

*Bid Adieu to the hassle of forming management committees and allotting unwanted job roles- switch to the smarter ways of Multi-management with **Edubold!***

Apart from this, the use of technology in the form of Edubold promises several other potent benefits for a school. As a school ERP software, Edubold promises proactive management of dedicated staff and their respective function. Using a management system that calls for an integrated plan of action, easy control over specific tasks and successful administrative feature in one platform is interesting in its own way.

As an 'all in one' management software for schools, Edubold promises ease and comfort not just for an organization but also for the students and parents. It rather works as a unified system to meet the diverse demands of different people associated with an educational institution. As Edubold steps ahead to streamline most of the management functions in a school, it walks hand in hand with everyone associated with it.

***The call for 'mutual benefit' is integral to the ethical beliefs of Edubold!***

## How Technology is Transforming the Face of Education System- Some Facts!

More than **90%** of school administrators believe that the use of technology in managing administrative functions leads to effective results. Also, it complements well with the higher performance of students in a constructive manner.

About **74%** of administrators support digital content. As said, it is a brighter way to enhance the level of engagement amidst staff, students and parents. Digital content strives for clarity in action.

According to statistics shared by  
**'Educators Technology'**

About **76%** of teachers believe in the 'responsive' merits of technology (both for students and staff). According to them, technology can play the role of a motivator in streamlining important management functions.

About **77%** teachers support the use of technology in various endeavors of management and teaching in school. Change in any form; be it in teaching style or managing administrative function is always welcomed by students.

Yet only **21%** of schools have adopted the various benefits of technology in their management systems.

## Manager's Roles: The Viable Change in Concept!

The conventional role of the managing committee in a school is to take the responsibility of planning the best 'tomorrow' for the students. In the course of making decisions, adding suggestions and improving the face of the education system, the managing committee is somehow responsible for the success or failure of the institution. While traditionally the job role of managing committee was ceased within the parameters of 'management', today it is more diversified with the addition of 'adoption'. Putting it in simple words, it is to answer the call of addition! What more can the system serve in the learning platter of students? What makes an education system unique and distinct from others?

## The difference between the needs of Conventional and Modern Education System:

---

### Conventional Education System

To impart education

To ensure best performance of teachers and students

Strives for nothing but pure education

Utmost belief in 'hard work' for maintaining paper records- a tiresome process.

### Modern Education System

To impart education with a distinctive edge- acceptance for changing technology and modern facet of society

To ensure and monitor best performance of teachers and students collectively!  
Analyzing performance with the aid of quick reports and statistics

Strives for the overall management and grooming of student- from hostel to transportation, fees, attendance and performance management, everything needs to be streamlined.

Acceptance for 'smart work' for maintaining virtual records- the call for multi-management tool for ensuring clickable comfort is dear to integral beliefs.

---

## 5 Important Ingredients for Constructive Management

*There is no denying the fact- ensuring constructive management in a school is vital in its own way! While the purpose of strengthening effective management in administrative functions is self explanatory, one thing that needs understanding is the ingredients required in forming a constructive base. As School ERP Software, **Edubold** promises the successful accomplishment of 5 vital ingredients in the system:*

### Clarity

How about working on a system that informs you about the correct path? A system where a student knows the direct way of taking admission, where the administrator can track performances with a simple click, where teachers can file attendance in a convenient manner, and where all the other management related tasks follow a 'call-to-action' approach! Clarity is the key to effective management-when you know the process of doing a piece of work, half of the work is already done!

### Transparency

Secrecy is negative- it abides confusion and frustration! How about using a system that understands the basic requirement of 'Transparency' in every action? A system that enable a transparent flow of administrative work, so that the students, parents, and staff knows the ongoing activities in the school! Transparency is an integral part of constructive management as it induces clarity in work. It is crucial because with the help of a transparent approach, the staff, students and parents can work on similar lines!

---

## Communication

A School ERP system like **Edubold** strives for clarity in communication among school management, students and parents. Free communication is vital for sustaining constructive ambiance in a system. **Edubold** creates the bond of 'commonness' between the people using it- it is this commonness that sets the base for effective functioning. While the maximum work of management is done with the help of the software, most of the thoughts and related concerns are freely communicated.

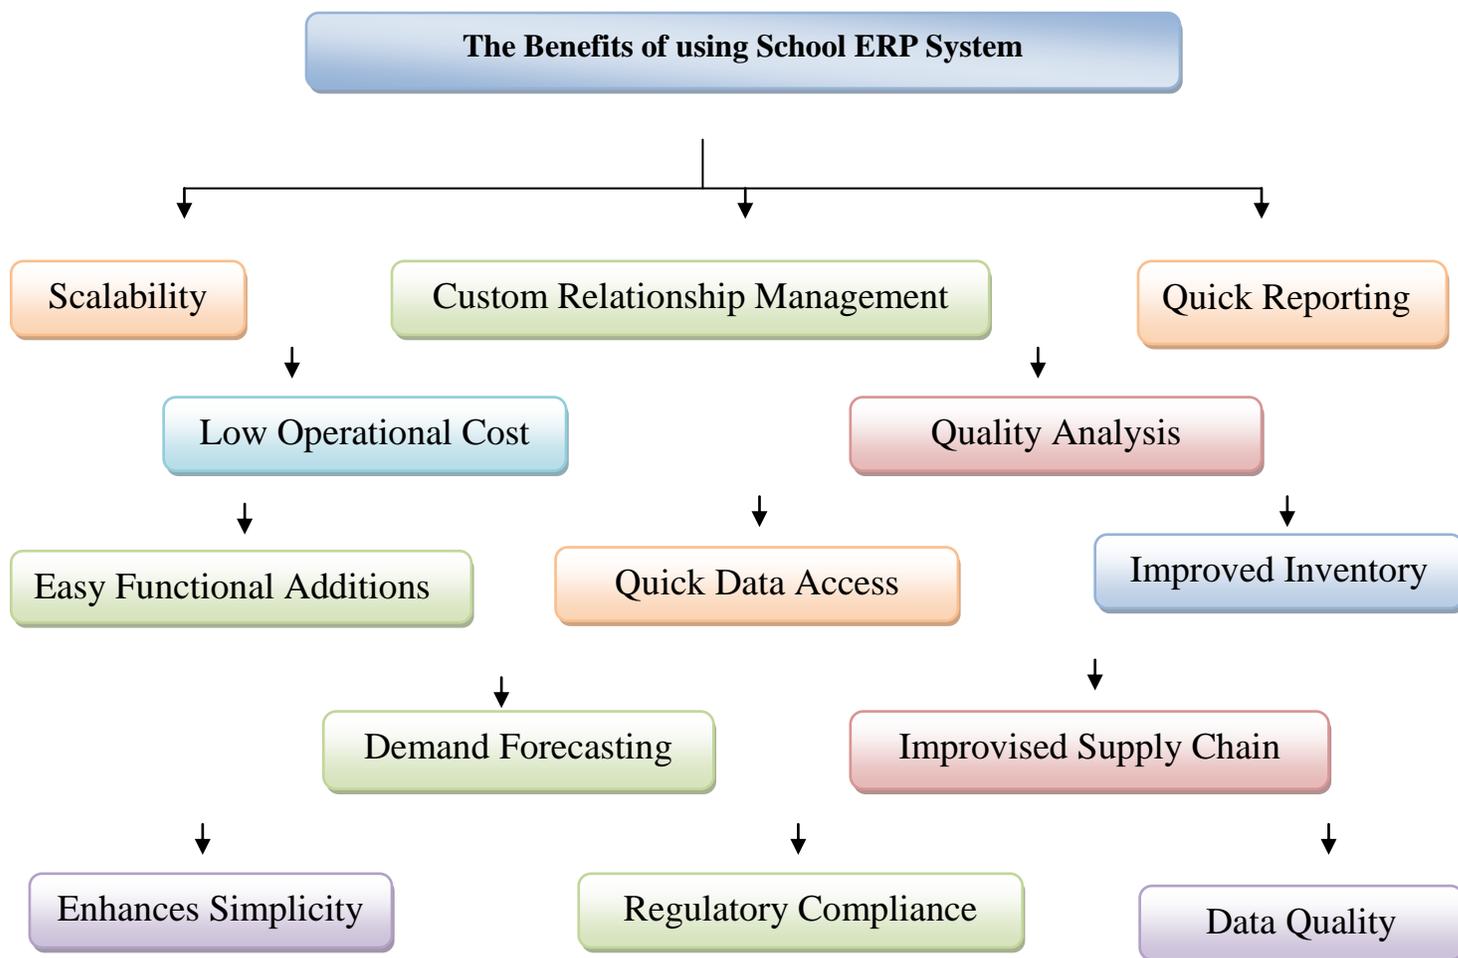

## Discipline

Anything that is flexible and disorganized cannot achieve discipline. For attaining the constructive state of discipline, it is important to follow a rigid set of action plan. As a school ERP tool, Edubold sets a disciplined approach for all. Be it the admission process or anything related to accounting and payroll, the system follows a defined protocol that has to be accepted by all (management, students and parents).

## Cooperation

Communication, clarity, transparency and discipline are only enabled with the aid of 'Cooperation'. For making a system successful, it is significant to understand the merits of cooperation for the benefit of all. Edubold invites the best call for cooperation among the ongoing school staff, students and parents. While following the path of constructive management, cooperation/compassionate behavior is what that sustains relationships in an organization.

---

A School ERP (Enterprise Resource Planning) system like **Edubold** shares the ability to provide quick updates, accurate information and valuable insight across the different functions in an organization. Specifically meant for the education industry, **Edubold** enables proactive access to automated admission procedure, fees submission, exam scheduling, engaging with faculty, etc. to students. For the school administration, Edubold strives for superior management of resources, crisp decision making, record maintenance and self-service portal. It wouldn't be wrong to declare **Edubold** as a 'one-stop access center' for students, staff and parents.

In the gamut of diverse management needs, every school needs a solution that is cost-effective and quality-packed at the same point in time. **Edubold** promises the best result in four major divisions of education, finance, accounting and data management.

### **Time Management**

In today's fast moving world, time is nothing but money- sustaining this valuable resource in the first and foremost duty of the school management! While most of the schools face difficulty in managing time, few of them rely on smart ERP solutions to serve the hour of need. **Edubold** plans for quick time management in school, so that education never takes a setback in shaping the brighter future of students.

### **Staff Management**

For any organization, manpower is indeed the most important resource! It becomes the responsibility of a school to manage manpower in the form of maintaining staff records, salary details, personal data, attendance statistics, fees records, student records, maintenance facts, and so on. **Edubold** takes likeminded steps for nurturing your best relationship with the manpower associated with your school.

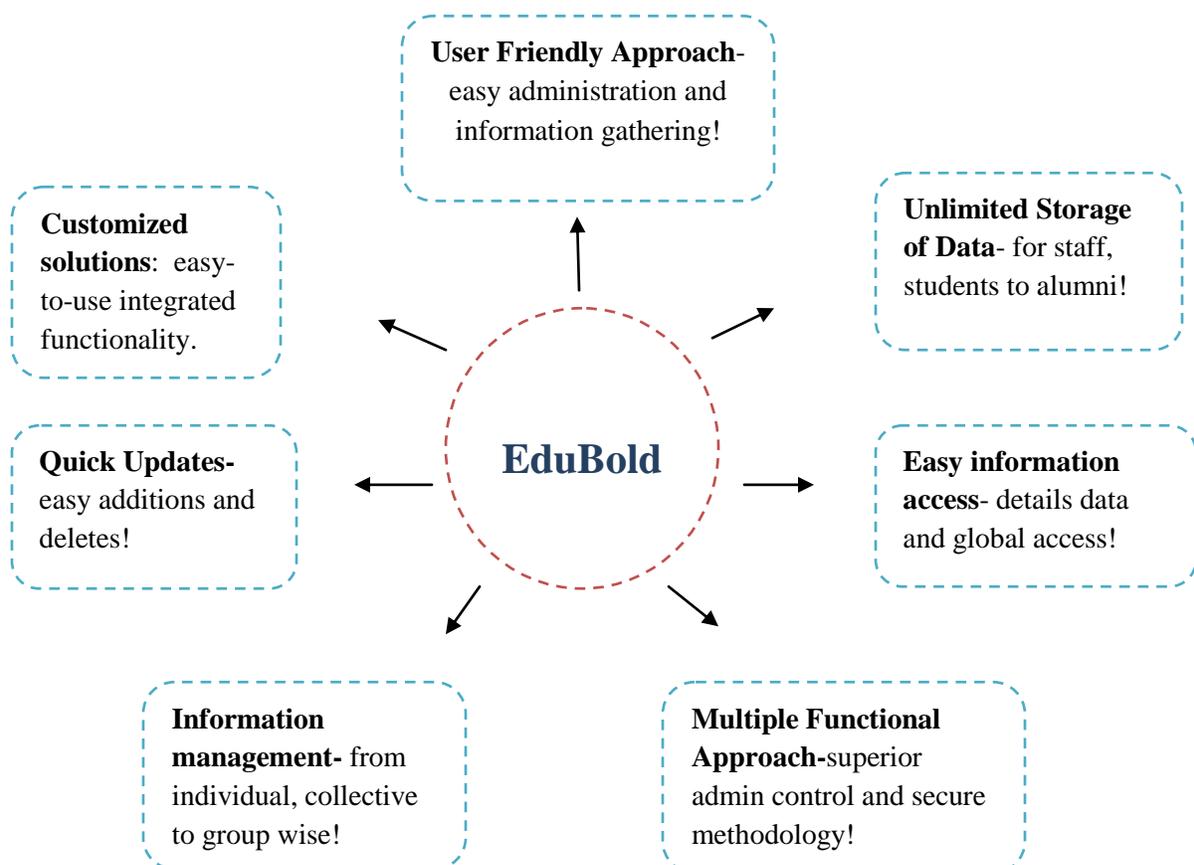

### **Quality Management**

Instability and inefficiency are two unavoidable factors that could bring disgrace to an organization! While stability in maintaining records and procuring data is vital on one end, enhancing speedy efficiency in each and every step in a must requirement. It is at least critical to the overall performance of a school. With **Edubold**, we understand the call of superior efficiency and stability in your institution. It is what you need for maintaining the steady pace of success!

### **Environment Management**

The burden of working in an uncertain system is not healthy for an organization! What is the need of burdening your staff with uncalled management activities when you already have the option of switching to more comfortable means? A happy working environment that exhibits transparency for the healthy use of communication is always acceptable. With **Edubold**, environment management is also looking at the broader picture of using 'paperless' technology!

## To Summarize- How **EduBold** can be the Best Technological aid to a school...!
